

Cancer Votes is the nation's leading election program educating the public and candidates about the actions lawmakers should take to make fighting cancer a national priority.

2018 U.S. House and Senate Candidate Questions

Ask your candidates where they stand.

SAVING LIVES THROUGH CANCER RESEARCH

If elected, will you vote for annual increases in cancer research funding for the National Institutes of Health and the National Cancer Institute?

ACCESS TO HEALTH CARE

If elected, will you oppose any bills that allow insurers to deny coverage or charge higher premiums to people with pre-existing conditions, reinstitute lifetime or annual caps, and/or weaken essential health benefits such as coverage for prescription drugs?

ELIMINATING DEATH FROM CERVICAL CANCER

If elected, will you support public-private efforts to share what we've developed in the U.S. to eliminate worldwide death from cervical cancer by supporting U.S. investment in global health funding for cervical cancer prevention, screening and treatment?

From now through Election Day, volunteers like you will be talking to candidates all over the country about cancer issues. Lawmakers must understand the enormous role they play in eradicating this disease, which strikes more than 1.7 million in America each year.
