2022 CANDIDATE QUESTIONS

Ask the Candidates Where They Stand

Saving Lives through Cancer Research

Rarely has the importance of medical research been more apparent than during this ongoing pandemic. Increasing federal funding for medical research is critical toward promoting further discovery. Will you vote for sustainable annual increases in cancer research funding for the National Institutes of Health and the National Cancer Institute?

Access to Health Care

Access to affordable, quality health care can determine whether you live or die from cancer. Will you support legislation to provide Americans access to affordable, quality health care that will ensure access to health insurance for everyone in the Medicaid coverage gap and ensure greater affordability of Affordable Care Act marketplace plans?

Equity in Clinical Trials

Clinical trials are key to advancing new standards of care that can improve survival and quality of life for people with cancer, but to be successful, trials must have adequate participation, including diverse participation from currently underrepresented groups. Will you support legislation to ensure more patients—regardless of their race, ethnicity, economic means or their geographic location—have a chance to enroll in clinical trials?

Cancer Votes is the nation's leading election program educating candidates and the public about the actions lawmakers should take to make fighting cancer a national priority.

From now through Election Day, volunteers like you will be talking to candidates all over the country about cancer issues. Lawmakers must understand the enormous role they play in eradicating this disease, which strikes more than 1.9 million Americans each year.

Paid for by the American Cancer Society Cancer Action Network,
655 15th Street NW, Suite 503, Washington, DC 20005.
