MEDPOR® Surgical Implants. Solutions for Neurosurgeons.

I do not perform cranioplasties
or skull base surgery.

MEDPOR® Customized Implants from Porex Surgical Products

Benefits of MEDPOR Customized Implants:

- Can be carved or feathered inter-operatively with a scalpel or burr if final adjustments are necessary due to sacring or fibrous tissue.
- Fixation accomplished with standard craniofacial plates or screws without the need to order pre-plating of implant
- Design capabilities include complex shapes such as facial and orbital anatomy*

e-viewCT™

advanced technology for innovative surgeons

Our e-viewCT option provides virtual 3-D viewing of customized implants at 360 degrees on a password protected Internet Web site.

*Due to the size and complexity of some defects, some customized implants may need to be produced in more than one piece and may not be suitable for on-line viewing. Under these circumstances, the production of a physical model may be required for review.
