

Shape DOES matter.

Restoring cranial skeletal asymmetry may be more cost-efficient than you think.

The best option may not always be the one with the highest price tag. In conversations with surgeons, we have found that MEDPOR® Customized Implants for cranial defects may be one of the most cost-efficient options available. Surgeons also note the strength and versatility of our implants, which can be carved or feathered inter-operatively with a scalpel or burr. Our Web-based e-viewCT™ ordering option expedites the manufacturing process, with most customized implants delivered in as little as two weeks.

Visit our Web site at www.porexurgical.com/neuro for more information about implants manufactured from MEDPOR Biomaterial, or to request a non-sterile sample.
