

Simple.  
Attractive.  
Stylish.  
Sophisticated.

## Lines so sleek, they'll never interfere with your plans.

At PolyVision, we've developed a new line of interactive whiteboards that lets you showcase your design skill while delivering a true walk-up-and-use experience to your clients.

Profiles are sleek. Messy cords and cables are replaced by an integral Power and Data Track. There's less clutter in the room – so more of what you've designed shines through. It's the perfect integration of technology and design.

We think you'll appreciate the elegant lines of these new products. We know your customers will appreciate the revolutionary walk-up-and-use simplicity that means no pre-meeting set-up, no special software and virtually no investment in training.

Call PolyVision today at 800.620.POLY.
