

FUMIFU™?

(foo – mē – foo)

First use must inspire future use.

It may sound simple, but it's true. Think about your first experience with any electronic device – was it easy to use or did you scramble to make it work?

Why do so many companies miss the value of simplicity?

That's why at PolyVision, we say, "FUMIFU . . . First Use Must Inspire Future Use." If you love your "first use" experience with a new technology, it will inspire you to use it again, and again, and again.

Why will you love your first experience with PolyVision products? Because FUMIFU is just the beginning. PolyVision's new line of products not only inspires future use, they start with a "Walk-Up-and-Use" experience and support existing pedagogy. PolyVision offers the widest portfolio of visual communications products available, including whiteboards, interactive whiteboards, and interactive plasma display systems. Why waste valuable time learning new electronics . . . call today and experience FUMIFU for yourself.

PolyVision's Walk-and-Talk™ Presentation Series incorporating the new Power and Data Track System is featured in the photo above.
