

# Please Support A **\$1 Billion** Increase to Fund the National Cancer Institute

We know that cutting-edge cancer research at the National Cancer Institute is leading to improved treatments that have the potential to improve and even save the lives of millions of Americans. We are now at a point where we can prevent approximately 50 percent of cancer deaths – but more progress is needed.

So why does Congress continue to cut funding for cancer research?

**As your constituent, I am asking you to support a \$1 billion increase to fund the National Cancer Institute. With your help, we can get back on the right track in funding the fight against cancer.**
